SUMMARY

Computer Science graduate with a keen interest in Data Analytics. Skilled in Excel, SQL, Python, and Power BI. Familiar with data preprocessing, exploratory data analysis, and data visualization. Looking for an entry-level position as a Data Analyst to extract meaningful business insights.

EDUCATION

Bachelor of Technology	2025
MGM's College of Engineering • Nanded • 7.14 CGPA	
High Secondary Certificate	2021
Shivaji College • Parbhani • 95.83 %	
Secondary School Certificate	2019
Bal Vidya Mandir • Parbhani • 89.40 %	

PROJECTS

1. Subscription Churn & Revenue Analysis (Power BI):

- Designed an optimized **Star Schema** data model for 700K+ records to enable scalable analytics and efficient reporting.
- Created **DAX measures and calculated columns** to analyse churn rate, revenue trends, customer retention, and KPIs.
- Developed an interactive **Power BI dashboard** with filters and drill-throughs, optimizing performance for faster query execution and reliable data refresh.

2. Pharmaceutical Product and Market Structure Analysis:

- Processed and formatted multi-source pharmaceutical data using Python (**Pandas, NumPy**) to build a combined data set.
- Developed a **Star Schema** in **MySQL** with staging, dimension, and fact tables, and tested data integrity using analytical SQL queries.
- Conducted **EDA** and developed interactive **Power BI** dashboards to visualize dominance in the medicine system, company product lines, and dosage distribution.

CERTIFICATIONS

Associate in IT Foundation Skills (Python) - Infosys Springboard	Aug 2024
Post Graduation Program In Data Science And Analytics – Imarticus Learning	March 2026

SKILLS

Programming Languages: SQL, Python (Numpy, Pandas, Scikit-learn, Matplotlib and Seaborn)

Machine Learning: Classification, Regression, Clustering techniques

Tools: Excel, Tableau and Power BI

Statistics: Descriptive Statistics, Inferential Statistics, Probability

Soft Skills: Analytical Thinking, Time Management, Communication Skills

Deep Learning: ANN, CNN, RNN

Research Work

"Smart Agriculture Using Iot and Machine Learning" Research Paper

IJARESM Journal

Jan 2025
