PROFESSIONAL SUMMARY

AI/ML enthusiast and Computer Science graduate with hands-on experience in Machine Learning, Data Analytics, Python, SQL, and NLP fundamentals. Skilled in building end-to-end ML applications involving data preprocessing, feature engineering, model training, evaluation, and deployment using Streamlit. Experienced with Pandas, NumPy, Scikit-learn, and GitHub. Passionate about solving real-world problems through AI and continuously learning modern ML technologies.

TECHNICAL SKILLS

Programming Languages

- Python
- SQL

Machine Learning

- Supervised Learning
- Classification
- Regression
- Model Evaluation
- Feature Engineering
- Hyperparameter Tuning

Natural Language Processing

- Text Preprocessing
- Tokenization
- TF-IDF Vectorization

- Cosine Similarity
- Resume & Job Description Matching (Project)
- Basic Text Similarity Techniques

Libraries

- Pandas
- NumPy
- Scikit-learn
- Matplotlib
- Seaborn
- NLTK
- spaCy
- Streamlit

Tools

- Git
- GitHub
- Jupyter Notebook
- VS Code
- Anaconda

PROJECTS

AI Resume–Job Description Matching System

Python | NLP | Pandas | Scikit-learn | Streamlit

- Developed an AI-based application that compares candidate resumes with job descriptions.
- Performed text cleaning, preprocessing, tokenization, stop-word removal, and normalization.
- Converted documents into TF-IDF vectors and calculated similarity using Cosine Similarity.
- Generated Job Match Score (0–100%).

- Identified Matched Skills and Missing Skills.
 - Classified candidates into Strong Match, Good Match, Moderate Match, and Low Match.
 - Built an interactive Streamlit interface for uploading resumes and JDs.
-

Deepfake Detection using EfficientNetB0

Python | TensorFlow | Transfer Learning | Streamlit

- Built a deepfake image detection model using transfer learning.
 - Applied image preprocessing and augmentation techniques.
 - Achieved approximately 76% validation accuracy.
 - Deployed the model using Streamlit.
-

Air Quality Index Prediction

Python | Pandas | Scikit-learn

- Performed exploratory data analysis and feature engineering.
 - Built regression models including Linear Regression, Decision Tree, Random Forest, and XGBoost.
 - Compared models using MAE, RMSE, and R^2 score.
 - Selected the best-performing model based on evaluation metrics.
-

EDUCATION

Bachelor of Technology (Computer Science & Engineering)

MGM College of Engineering, Nanded

Graduated: 2025

CERTIFICATIONS

- Python Programming
- Machine Learning Fundamentals
- SQL for Data Analysis

- Power BI for Data Analytics
-

STRENGTHS

- Problem Solving
 - Analytical Thinking
 - Quick Learner
 - Team Collaboration
 - Communication Skills
 - Attention to Detail
-

LANGUAGES

- English
- Hindi
- Marathi
