

❖ Summary

Detail-oriented Data Analyst with hands-on experience in SQL, Python, Excel, Power BI, and Tableau, specializing in data cleaning, exploratory data analysis (EDA), business intelligence, and dashboard development. Proven ability to transform raw data into actionable business insights using advanced analytics, data modeling, and visualization techniques. Strong foundation in database management, automation, and performance reporting, with a passion for solving business problems through data-driven decision-making.

❖ SKILLS

Advanced Excel
Power BI
SQL
Python
Machine Learning
Data Visualization
Business Analysis
Problem Solving
Critical Thinking

❖ CERTIFICATIONS

Infosys Springboard
· Programming Fundamentals using Python
· Database Management System
· Data Structure and Algorithm Using Python

Data Analytics - ExcelR

■ EXPERIENCE

Data Analyst

Sept 2025 – Feb 2026

ExcelR Solutions Private Limited

- Performed data cleaning, transformation, and exploratory data analysis (EDA) on real-world business datasets to derive actionable insights.
- Built interactive dashboards and reports using Power BI and Tableau to monitor KPIs and support strategic decision-making.
- Wrote complex SQL queries for data extraction, aggregation, and reporting across relational databases.
- Collaborated with cross-functional teams to understand business requirements and translate them into data-driven solutions.

■ PROJECTS

Adventure Work

Technology Used: Power BI, Excel, Tableau, MySQL

- Analyzed large structured datasets to identify trends in sales, revenue, profit, and customer behavior.
- Conducted EDA and data validation to ensure high data accuracy and consistency.
- Wrote complex SQL queries (JOIN, UNION, GROUP BY, subqueries) to generate business insights.
- Designed executive dashboards in Power BI & Tableau to support strategic business decision-making.

Customer Relationship Management (CRM) Analytics

Tools: Excel, SQL, Power BI, Tableau

- Analyzed customer and sales data to generate actionable insights. Built interactive dashboards in Power BI and Tableau to track KPIs such as lead conversion rate, win rate, and forecast revenue.
- Performed data cleaning and transformation using Excel and SQL. Developed SQL queries to extract and analyze opportunity, lead, and revenue data.
- Monitored sales performance and opportunity trends through dynamic visualizations and KPI tracking.

Employee Management System

Technology Used: MySQL, Python

- Built a Python–MySQL backend system for managing employee records with secure CRUD operations.
- Implemented transaction handling, exception management, and query optimization for reliable database interactions.
- Automated employee promotions, salary updates, and real-time reporting to improve workflow efficiency.

■ EDUCATION

Bachelor of Engineering (Computer Science & Engineering)

Dec 2021 — Jul 2025

MGM's College Of Engineering – Nanded

12th (Science)

Apr 2019 — Mar 2021

Blue Bells Jr. College – Nanded

Matric (10th)

Apr 2009 — Mar 2019

Nagarjuna Public School – Nanded
